

P.S. I hope my book "Advanced Continuations"
will be ready in May or June - I not hope.

1st of March 1944 ^{A3262}

I also read your very interesting article in "Homonidically" about explicit pulses for
certain sequences which are defined
by recurrence...

Dear Professor Skane,

Thank you very much for your book that I just
received a few days ago. Wonderful and so interesting.
I shall stay in Canada during May, and leave
from Montreal on the 10th of June. I hope to visit,
in ~~1 or~~ 2 days, New-York. May I hope to see
you there, if possible?

With all my congratulations for your nice book.
