Dear Mr. Sloane:

After reading the October issue of Discover Magazine, I sent the editor the enclosed letter and information. Since he may contact you regarding it, I am sending you the same information.

I believe the patent is relevant to your work, and that having an exclusive license to use it would be of value to A.T. & T.

The circle packing has obviously unique properties, as does the sphere pack. I hope you find exploring them to be as exciting as I have.

I look forward to your response.

Yours truly,

*Don Wilkinson*
